### Analysis of Library Book Loans in Relation to User or Subject in Kyushu Dental College

Yutaka Takata

Division of General Internal Medicine, Department of Health Promotion,  
Science of Health Improvement, Kyushu Dental College, Kitakyushu, Japan

\*Chief Librarian of Kyushu Dental College Library

E-mail: yutaka@kyu-dent.ac.jp

The total number of 22,335 books loaned from Kyushu Dental College Library between April 2004 and March 2007 was evaluated in relation to user or subject. Of 22,335 books, 20,073 (89.9 %) were related to dentistry, and 2,262 books were not. There were 12,732 clinical dentistry books (57.0 %), and 5,751 basic dentistry books (25.7 %). Books related to dental prosthetics showed the highest result (3,041; 13.6 %) in a clinical dentistry subject, and the next highest were 1,485 for oral surgery (6.6 %), 1,237 for preventive dentistry (5.6 %), and 1,157 for dental orthodontics (5.2 %). The highest figure was 1,326 (5.9 %) for oral anatomy among basic dentistry subjects, and the next highest totals were 1,005 (4.5 %) for dental engineering, and 903 (4.0 %) for oral pathology. 19,432 student users (undergraduate students, students of the dental hygiene school, graduate students, research students, and special students; 87.0 %) and 2,903 non-student users (teachers, staff, residents, and others; 13.0 %) borrowed books, and undergraduate students were the maximal users (15,265 times; 68.3 %). Undergraduate students borrowed 7,962 clinical dentistry books and 5,123 basic dentistry books, which totalled 58.6 %. Among particular books loaned, *Partial Dentures for Dental Students* (2<sup>nd</sup> edition) was the one most borrowed (153 times), *Dental Orthodontics* (3<sup>rd</sup> edition) was second (115), and *Dental Anesthesiology* (5<sup>th</sup> edition) was third (99).
